DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-50, 56--74 are drawn to a pharmaceutical formulation, a drug delivery system device and a dosage form comprising a corticosteroid and a bronchodilator, classified in class 514, subclasses 177, 178, 649, 653, for example.
- II. Claims 51-55, drawn to a method of treating pulmonary disease responsive to treatment with a bronchodilator/corticosteroid combination, classified in class 514, subclasses 177, 178, 649, 653, for example.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case any of the named disorder can be treated by employing a bronchodilator or a corticosteroid alone.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Specie Election

Claims 1-4, 9, 14-20, 25-31, 36-41, 43, 45, 47-63, 65, 67, 69-74 are generic to a plurality of disclosed patentably distinct species comprising bronchodilators. Claims 1-13, 15-24, 26-35,

Art Unit: 1617

37-47, 49-69 and 71-74 are generic to a plurality of disclosed patentably distinct species comprising corticosteroids. **Applicant is required under 35 U.S.C. 121 to elect a single disclosed species (i.e., one specific corticosteroid and one specific bronchodilator), even though this requirement is traversed.** The search for each of the compounds encompassed by the broad genus of bronchodilators and/or corticosteroids represents a separate field of pharmaceutical arts having a separate field of search. The search for all species of the above-mentioned genera (i.e., corticosteroids and bronchodilators) is therefore an undue burden on the office. Note that the search is not limited to the patent files.

~~Should applicant traverse on the ground that the species are not patentably distinct,~~
applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that in order for the reply to this requirement to be complete it must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Because the above restriction/election requirement is complex, a

telephone call to the applicant's agent to request an oral election was not made. See M.P.E.P. Sec 812.01.
